

SENIOR ENGINEER

# DANIIL TROFIMOV

TURIN, ITALY · [DANIIL@VIVALDI.NET](mailto:DANIIL@VIVALDI.NET) [GITHUB](#) [LINKEDIN](#) [TELEGRAM](#)

## PROFESSIONAL SUMMARY

---

Senior Backend Engineer with 8+ years of experience building scalable web applications, microservices, and distributed systems. Core expertise includes Go (5+ years), PHP (7+ years), TypeScript with Node.js (4+ years), and Vue.js (3+ years).

Experienced in owning complex backend systems from architecture and implementation through rollout and production support, with a focus on concurrency, asynchronous processing, data consistency, graceful failure handling, and high-performance messaging systems.

## EXPERIENCE

---

### MINDALL

DUBAI, UAE · REMOTE

Ecosystem of products for housing, real estate agencies, property management, lead processing, employee management, and deal lifecycle automation.

#### Backend Developer

DEC 2021 — JUL 2026

- Designed and implemented several services within a platform of 30+ microservices, including Go services for telephony, mortgage workflows, collections, and dashboards.
- Built a dynamic custom-fields subsystem with typed validation and safe filtering over PostgreSQL JSONB data.
- Owned the Stripe subscription lifecycle across checkout, trials, plan changes, signed webhooks, reconciliation, and failure handling.
- Built cross-service RBAC and ABAC authorization that translated policies into row-level database constraints for multi-tenant isolation.
- Designed a rule-based lead-routing workflow with availability-aware, least-loaded broker assignment.
- Built an authentication service with JWT access/refresh tokens, Google OAuth2, and WebAuthn.
- Revived automated testing, introduced a code style linter, and set both up in GitLab CI/CD.
- Integrated with Facebook, WhatsApp, Instagram, LinkedIn, Twitter, ChatGPT and multiple other external services.

### VIAMOBI

MOSCOW, RUSSIA · HYBRID

Provider of services delivered in cooperation with Eastern European and West Asian mobile operators.

#### Backend Developer

SEP 2020 — DEC 2021

- Implemented a monitoring system for partner traffic regulation that calculated subscription KPIs and blocked unreliable sources automatically.
- Replaced a high-load database with 20M+ records, reducing select query latency from ~3s to ~100ms.
- Maintained the billing core and delivered numerous integrations with mobile operators and traffic sources.
- Developed scoreboard ranking logic for an educational platform.

# BLACK WALL GROUP

MOSCOW, RUSSIA · ON-SITE

Digital project studio specializing in a wide range of projects, with a particular focus on e-commerce.

## Full-stack Developer

JAN 2018 — AUG 2020

- Led the delivery-service integration for an e-commerce platform, coordinating requirements, implementation and multiple delivery partners.
- Met with clients to gather feature requirements, documented requested functionality, and delegated implementation tasks.
- Configured full-text product search for an online shop using the Sphinx engine.
- Developed a large part of the back office across frontend and backend components.
- Built a real-time audience polling system for a festival.

## SKILLS & EXPERTISE

### PRIMARY STACK

Go · PHP (Laravel) · TypeScript (Node.js / Vue.js)

### PLATFORM

Linux · Git · Docker · Docker Compose · CI/CD · Nginx · Docker Swarm · Kubernetes

### CLOUD

AWS · DigitalOcean · Cloudflare · Self-hosting

### DATA & MESSAGING

MySQL · PostgreSQL · MongoDB · Elasticsearch · Sphinx · ClickHouse · Redis · RabbitMQ · NATS · Apache Kafka

### ARCHITECTURE & QUALITY

REST · GraphQL · WebSockets · Unit testing · Integration testing · E2E testing · Prometheus · InfluxDB · Grafana

### AI

Claude Code · Codex · OpenCode · OpenRouter API

## LANGUAGES

### RUSSIAN

Native

### ENGLISH

Fluent

### ITALIAN

Pre-Intermediate

### GERMAN

Basic

## RELATED

- Built Termorize, a side project that helps people learn and retain foreign-language vocabulary.
- Won in multiple CTF cybersecurity competitions during high school and university, developing practical familiarity with web vulnerabilities and cryptography.
- Studied crypto mechanics in depth and built a side project that interacted programmatically with Bitcoin, Ethereum, and TON.
- I have 3+ years of experience teaching computer science to teenagers and building educational projects with them.
- 300+ LeetCode problems solved.
- Fixed a small bug in Laravel.
