PROFESSIONAL SUMMARY

Team Lead and Backend Developer with 8+ years of hands-on experience building web applications and backend systems. Experienced in leading engineering teams, conducting technical interviews, mentoring new hires, and guiding architecture and delivery.

Strong expertise in Go, PHP, and Node.js, with frontend experience that supports effective cross-functional delivery. Skilled at translating business requirements into release plans, improving delivery through automated testing, CI/CD, and internal tooling, and helping teams build reliable systems they can confidently own.

EXPERIENCE

MINDALL

DUBAI, UAE · REMOTE

Ecosystem of products for housing, real estate agencies, property management, lead processing, employee management, and deal lifecycle automation.

Team Lead

OCT 2024 — JUL 2026

- Led a team of 4 engineers, reported directly to the CTO, planned releases, and distributed features and tasks across the team.
- Led backend delivery across a platform of 30+ microservices, setting patterns for federated GraphQL services, authorization, and event-driven integration over NATS and JetStream.
- Owned and delivered the Stripe subscription lifecycle across billing, checkout, webhooks, trials, plan changes, and failure handling.
- Interviewed backend candidates, onboarded new hires, and mentored developers through architecture and code reviews and delivery planning.

Backend Developer

DEC 2021 — OCT 2024

- Designed a load-resilient database architecture and a rule-based lead-routing workflow with availability-aware broker assignment for a real estate CRM.
- Built an authentication and authorization service with JWT access/refresh tokens, Google OAuth2, WebAuthn, and row-level access policies.
- Revived automated testing, introduced a code style linter, and set both up in GitLab CI/CD.
- Integrated with Facebook, WhatsApp, Instagram, LinkedIn, Twitter, ChatGPT and multiple other external services.

VIAMOBI

MOSCOW, RUSSIA · HYBRID

Provider of services delivered in cooperation with Eastern European and West Asian mobile operators.

Backend Developer

SEP 2020 — DEC 2021

- Implemented a monitoring system for partner traffic regulation that calculated subscription KPIs and blocked unreliable sources automatically.
- Replaced a high-load database with 20M+ records, reducing select query latency from ~3s to ~100ms.
- Maintained the billing core and delivered numerous integrations with mobile operators and traffic sources.
- Developed scoreboard ranking logic for an educational platform.

BLACK WALL GROUP

MOSCOW, RUSSIA · ON-SITE

Digital project studio specializing in a wide range of projects, with a particular focus on e-commerce.

Team Lead

AUG 2019 — AUG 2020

- Stepped into the Team Lead role, coordinated 2 frontend developers, and owned backend delivery for an e-commerce delivery-service integration.
- Gathered client requirements, translated them into implementation tasks, and coordinated delivery across multiple logistics partners.

Full-stack Developer

JAN 2018 — AUG 2019

- Configured full-text product search for an online shop using the Sphinx engine.
- Developed a large part of the back office across frontend and backend components.
- Built a real-time audience polling system for a festival.

SKILLS & EXPERTISE

PRIMARY STACK

Go · PHP (Laravel) · TypeScript (Node.js / Vue.js) · Technical Leadership

PLATFORM

Linux · Git · Docker · Docker Compose · CI/CD · Nginx · Docker Swarm · Kubernetes

LEADERSHIP

Release planning · Mentoring · Work breakdown & delegation · Code review · Architecture decision-making · Hiring & interviewing

AI

Claude Code · Codex · OpenCode · OpenRouter API

DATA & MESSAGING

MySQL · PostgreSQL · MongoDB · Elasticsearch · Sphinx · ClickHouse · Redis · RabbitMQ · NATS · Apache Kafka

ARCHITECTURE & QUALITY

REST · GraphQL · WebSockets · Unit testing · Integration testing · E2E testing · Prometheus · InfluxDB · Grafana

CLOUD

AWS · DigitalOcean · Cloudflare · Self-hosting

RELATED

- Built Termorize, a side project that helps people learn and retain foreign-language vocabulary.
- Won in multiple CTF cybersecurity competitions during high school and university, developing practical familiarity with web vulnerabilities and cryptography.
- Studied crypto mechanics in depth and built a side project that interacted programmatically with Bitcoin, Ethereum, and TON.
- I have 3+ years of experience teaching computer science to teenagers and building educational projects with them.
- Fixed a small bug in Laravel.
